

Emacs cart.el test presentation

Nidish Narayanaa Balaji

March 4, 2024

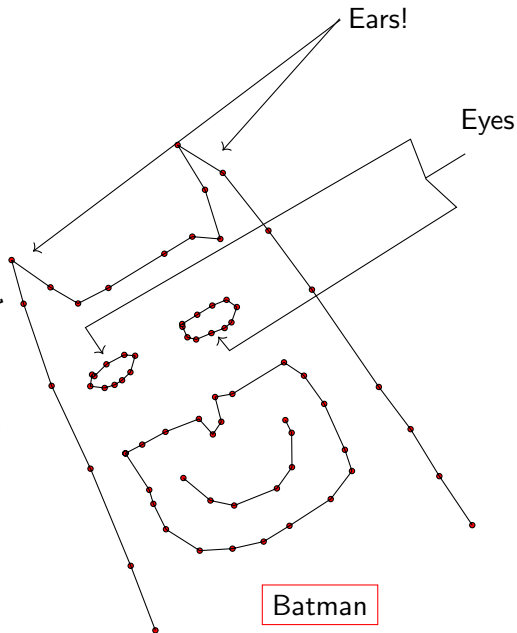

Test Frame 1

- Nodes can be inserted using `cart-tikz-node`
- Draw can be inserted using `cart-tikz-draw`

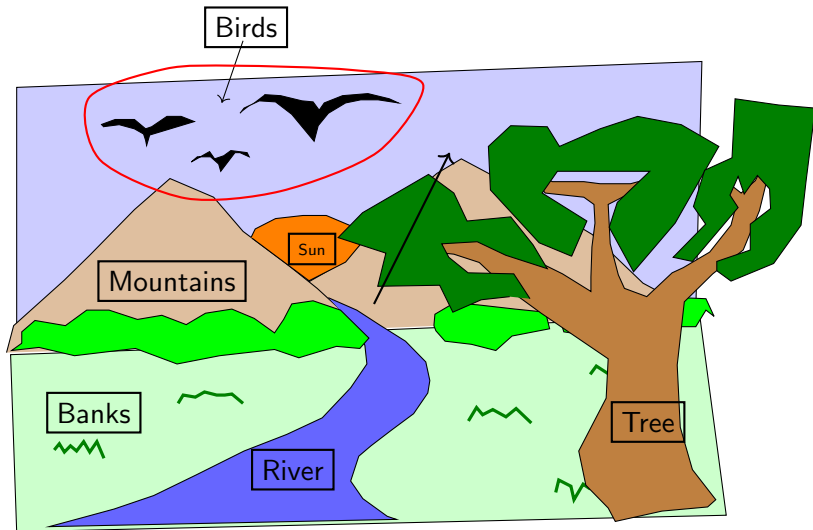

Rotated Test Frame 1

- Translations of selected objects through `'cart-translate-tikz`
- Rotations of selected objects through `'cart-rotate-tikz`

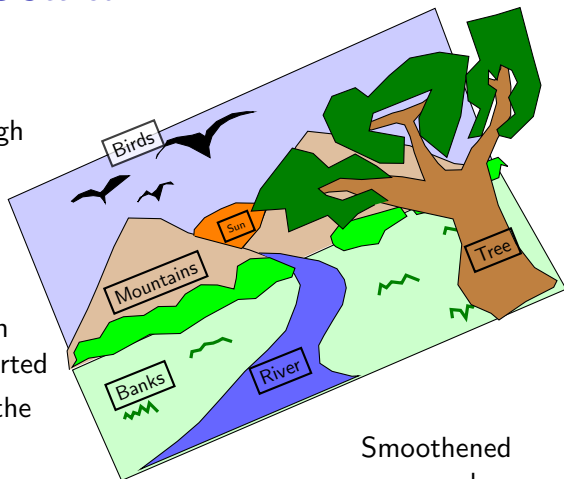

Test Frame 2

Test Frame 2 Rotated & Scaled

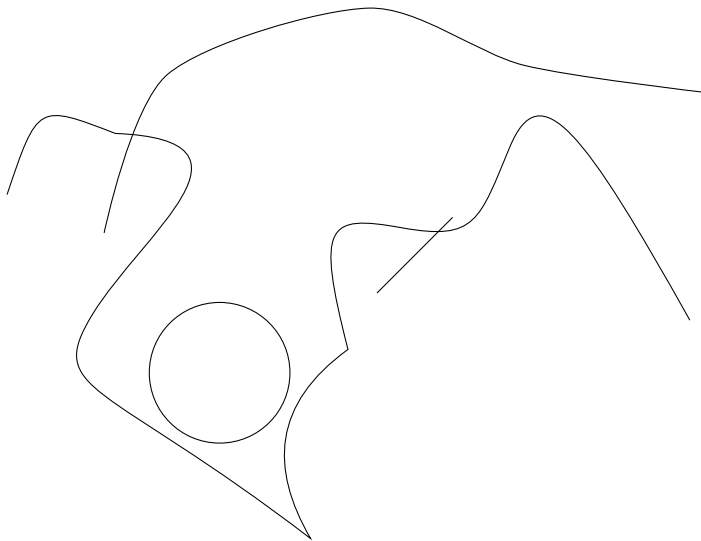

- Translations/rotations through `cart-translate-tikz/`
`cart-rotate-tikz`
- Scaling through `cart-scale-tikz`
- Node value rotations through the `rotate` fields also supported
- Node value scaling through the `scale` fields also supported

Smoothened
curves also
supported!

Test Frame 3

Test Frame 3

Lognormal Distribution

$$k = e^{\mu_\ell + \sigma_\ell Z}, \quad Z \sim \mathcal{N}(0, 1)$$

new
This is a block! (2,3)

Test Frame 4
